Agriculture & Food Organizations

Following a thinkAG Career Competition,

of agriculture & food industry volunteers agree that their participation had a positive impact on students

The thinkAG Career Competition was a fantastic experience! It opened my eyes to the wide range of careers in agriculture, from technology to sustainability. I enjoyed the hands-on activities and the chance to hear directly from professionals. It was inspiring and has made me more excited to explore opportunities in the industry!

- Grade 7 student

The competition-based stations made the event even more engaging for my students. Many stations featured hands-on activities, giving my students the opportunity to experience what jobs in these fields have to offer. My students left the event knowing a lot more about agricultural careers.

- Grade 8 teacher

This program offers an opportunity to share the importance of Ontario's agricultural industry with students who may not have previously considered how food is produced or the role of a strong agricultural sector in the province. Learning about employment opportunities and understanding the efforts to build a strong, sustainable agricultural sector will benefit students in the future.
