

2025-26 SCHOOL YEAR IMPACT REPORT

thinkAG Career Competitions

3,576 educational experiences provided to youth

11 events

25 sessions

think**AG**

It was great to see students so engaged at our booth, showing genuine interest and curiosity—asking questions, learning about different roles, and getting excited about the possibilities. Events like this are a valuable way to highlight the important connection between our work and agriculture, and we're grateful to be part of that experience.

- Agriculture & food industry volunteer

Educational Resource Distribution

5,205 resources accessed by educators

2,211 classrooms reached

Agriculture & Food Careers Initiative

50,877 educational experiences provided to youth

16 career events

3 agricultural fairs

This is an excellent initiative, and I hope it is promoted and used in the school system. There are so many careers featured in this material that many students are unaware of and have no access to.

- Ontario Association of Agricultural Societies member

Teacher Ambassador Program

24,076 educational experiences provided to youth

1,024 TAP workshops delivered

175 schools reached

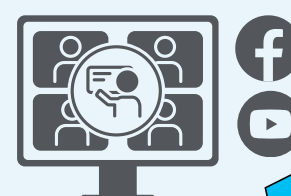

The workshop was engaging and informative for my students, covering the history of agriculture and the food system. It explained how agriculture has evolved over time in a clear, age-appropriate manner and highlighted the diverse range of people involved in bringing food from farm to table.

- Grade 10 teacher

Virtual Field Trips

53,823 educational experiences provided to youth

13 live-streamed events

1,411 classrooms reached

It was so informative; the host was great at explaining their entire process from start to finish. I enjoyed how the host answered the live questions. It was great to see things up close. We learned so much that we are going to watch the recording tomorrow to pick up more information and complete a writing assignment.

- Grade 3 teacher

Professional Development

1,331 experiences provided to adults

12 workshops provided to adults

The workshop was engaging, fostered collaboration, and integrated technology. I also appreciated the resources that were shared with us. They will be very helpful.

- Science teacher

258,964 agriculture and food educational experiences provided to youth
